

Materials

- Red and green construction paper or card stock
- Scissors
- Lollipop
- Glue stick

Instructions

1. From red construction paper, cut out a heart that's just larger than the lollipop candy and glue it to the wrapper.
2. For the leaves, fold the green paper in half and cut out a leaf shape, leaving the two sides attached at the seam.
3. Unfold the double leaf shape, coat the entire inside surface with glue, and fold it back over the lollipop stem, pressing to secure.

Tips:

If you use cardboard templates, one child can trace and cut hearts while another works on the leaves.
