

How to make a Tie Fleece Blanket

Things you'll need:

2 yards of solid fleece fabric
2 yards of pattern fleece fabric
Scissors
binder clips or paperclips

Directions:

1. Lay the fabric out evenly over the top of each other, and clip them together so that they don't move or shift
2. Choose a side to begin on, and begin cutting 3 to 4 inch strips about an inch apart from each other.

3. Continue cutting 3 to 4 inch strips around the entire blanket – don't worry if the corners get cut off – they should eventually look like a right angle
4. Begin tying the two fabric strips together. The pieces that were cut together are tied together in a loose knot.
